

GAJENDRA TYAGI

Senior Full Stack .NET Developer | Azure Integration & Microservices

gajendratyagi1991@gmail.com | +91 97913 76534 | Noida, India

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 10 years of experience building and integrating enterprise web applications using .NET Core, C#, and Angular. Specializes in cloud-native, event-driven integrations on Microsoft Azure — including Azure Functions, Service Bus (Topics & Queues), and microservices architecture. Combines hands-on backend engineering with architecture decision-making, sprint/story refinement, and mentoring of junior developers. Now targeting Team Lead / Solution Architect roles to drive scalable, cloud-first engineering solutions.

CORE TECHNICAL SKILLS

- Languages & Frameworks: C#, .NET Core, .NET Framework 4.5, ASP.NET Web API, MVC, Entity Framework, Angular, AngularJS, HTML5, TypeScript
- Cloud & Integration (Azure): Azure Functions, Azure Service Bus (Topics & Queues), Azure Batch Jobs, Event-Driven Microservices Architecture, API/System Integration
- Database: SQL Server — Stored Procedure Development & Performance Optimization
- Engineering Practices: Microservices Design, REST API Development, CI/CD, Unit Testing, Code & Design Reviews
- Tools: Visual Studio, VS Code, Postman, SQL Server Management Studio, JIRA, ServiceNow, Git, TFS
- Leadership: Team Leadership, Architecture Decision-Making, Story Refinement, Developer Mentoring & Training

PROFESSIONAL EXPERIENCE

Senior Associate – Full Stack Developer, Cognizant Technology Solutions

Mar 2019 – Present

Project: Football Platform (Referee Registration & Account Management) | Noida | .NET Core Web API, Azure, SQL Server, Angular

- Design and build backend microservices with .NET Core Web API, contributing to key architecture decisions on service boundaries and scalability.
- Implement asynchronous integration workflows using Azure Service Bus Topics and Queues, enabling reliable, decoupled communication across microservices.
- Lead front-end delivery in Angular as Front-End Lead, owning UI architecture and code quality standards for the platform.
- Actively participate in architecture decision-making and story refinement sessions, translating business requirements into technical designs.
- Mentor and train associate-level developers on Angular and front-end best practices, improving ramp-up speed for new team members.

Associate – Full Stack Developer, Cognizant Technology Solutions

Jan 2018 – Mar 2019

Project: CCI Smart Bikes | Hyderabad | .NET Core Web API, MVC, C#, SQL Server, Azure

- Developed and maintained REST APIs using .NET Core Web API and MVC to support core smart-bike platform functionality.
- Built and scheduled Azure Batch Jobs to automate recurring business processes, reducing manual effort.
- Participated in CI/CD-driven deployments, supporting consistent and reliable release cycles.
- Optimized SQL Server stored procedures and monitored batch jobs to improve system performance.

Programmer Analyst, Cognizant Technology Solutions

May 2016 – Dec 2017

Project: Cigna – Distributed Applications | ASP.NET, C#, SQL Server

- Delivered enhancements and automation for a distributed enterprise application built on ASP.NET, C#, and SQL Server.
- Provided post-production support and resolved QA-identified defects to maintain application stability.

Programmer Analyst Trainee, Cognizant Technology Solutions

Jan 2016 – May 2016

Project: LMS – Learning Management System | Chennai | AngularJS, HTML, SQL Server

- Developed controllers and stored procedures for a learning management platform.
- Performed code analysis and unit testing; participated in code and design reviews.

EDUCATION

- Master of Technology, Computer Science — JayPee University of Information Technology, Solan, Himachal Pradesh | CGPA 9.5 | 2015
- Bachelor of Technology, Computer Science — Uttar Pradesh Technical University, Lucknow | 75.24% | 2012
